

COMPANY CASE STUDY

Arowwai Industries

Background

Established in 2010, Arowwai Industries is committed to sustainability and innovation in packaging. Their vision is to reduce environmental impact through responsible practices, while their mission is to provide high-quality, sustainable packaging options to clients across various sectors.

Overview

This business plan outlines a strategic approach to expand Timmerman Industries by strengthening market position, improving customer engagement, and driving long-term profitability. With a focus on innovation, data-driven decisions, and customer experience, our plan aims to guide sustainable business growth over the next 12–24 months.

Goals and Objectives

Brand Awareness

Increase Brand Awareness by 40% in 12 months through strategic campaigns.

Boost Sales

Boost Sales by 25% within the first year of implementing this plan.

Market Expansion

Expand Market Reach by entering 2–3 new regional markets.

BENEFITS

Benefits One

1 Give your colleagues additional context to your report by using a section header for some introductory message or background.

Benefits Two

2 Create stunning reports by identifying the pertinent information you want to share with your colleagues.

Overview

This business plan outlines a strategic approach to expand Timmerman Industries by strengthening market position, improving customer engagement, and driving long-term profitability. With a focus on innovation, data-driven decisions, and customer experience, our plan aims to guide sustainable business growth over the next 12–24 months.

TITLE

A Journey of Innovation and Success

OVERVIEW

Borcelle embarked on a transformative journey to turn innovative ideas into tangible business impacts. Through a strategic partnership with Giggling Platypus Co. they implemented cutting-edge solutions designed to enhance operational efficiency, drive growth, and achieve significant competitive advantages. This case study outlines the strategic approach, key initiatives, and remarkable results of this collaboration.

Overview

This business plan outlines a strategic approach to expand Timmerman Industries by strengthening market position, improving customer engagement, and driving long-term profitability. With a focus on innovation, data-driven decisions, and customer experience, our plan aims to guide sustainable business growth over the next 12–24 months.

Goals and Objectives

Brand Awareness

Increase Brand Awareness by 40% in 12 months through strategic campaigns.

Boost Sales

Boost Sales by 25% within the first year of implementing this plan.

Market Expansion

Expand Market Reach by entering 2–3 new regional markets.

Customer Retention

Improve by launching personalized loyalty & after-sales service programs.

Develop Partnerships

Develop Partnerships with local influencers and key industry players.

FAQ Sheet

Roadmap Value

Q: Why do we need a roadmap instead of starting with quick wins?

A: Quick wins are useful, but without a roadmap they often create multiple versions of truth, manual reconciliation, and one-off integrations. A roadmap ensures each initiative strengthens the same pit-to-port operating logic, so pilots scale safely and benefits compound rather than reset at every rollout.

Integration First

Q: What does “integration-first” mean for management decisions?

A: It means agreeing the end-to-end handoffs and the minimum evidence required at each handoff before tools multiply. This reduces cross-department disputes and prevents the operation from depending on spreadsheets, phone calls, and “truth hunts” to run day to day.

Architecture First

Q: Why is “architecture-first” not just an IT preference?

A: Because mining is 24/7, distributed, and safety-constrained. If each project builds its own connectivity, security, identity, and integration approach, reliability and support costs escalate. Architecture-first standardizes shared foundations once, so every new capability becomes cheaper, safer, and easier to operate.

Frontline Adoption

Q: Why do we keep saying the frontline should be the first audience?

A: Because the frontline is where operational truth is created. If workflows are not practical on shift—especially under time pressure and weak connectivity—people will use workarounds, and data credibility collapses. Designing for the frontline first makes adoption natural and keeps the digital record defensible.

Other

Q: Can I have an NDA?

A: Yes, depending on the client's needs.

About Us

Machine Vision Indonesia is a technology-driven company established in 2017 with a mission to accelerate digital transformation in the manufacturing sector. Our flagship product, the MV Digitalization Platform, is designed to seamlessly connect people, machines, systems, and devices—empowering factories with real-time visibility, actionable insights, and enhanced control across the production value chain.

We specialize in integrating three essential domains:

- **Lean Operation** – streamlining processes to reduce waste and improve efficiency.
- **Information Technology (IT)** – enabling scalable, secure, and user-friendly digital systems.
- **Operational Technology (OT)** – connecting to sensors, PLCs, SCADA, and industrial protocols for robust data acquisition.

With this multidisciplinary approach, we help manufacturers modernize operations through AI-powered machine vision, MES, WMS, and other Industry 4.0 solutions. We take pride in being more than just a solution provider—we are your strategic partner in driving measurable improvement, cultural transformation, and long-term digital resilience.
